DECIBIVE ACTION.

There is one thing possible in the presept state of affairs on the New York Central which will bring the relief so greatly desired by the public and by the strikers. If the State Board of Arbitration institutes a proper investigation of the reasons which led to the discharge of the amployees of the road the knot will be cut which is now tieing up so many interests.

The State Board is not only authorized to conduct such an investigation and empowered to subpœna witnesses and compel them to answer the questions the Board may direct to them, but the words of the statute are mandatory in their character.

The law says that in case of a lockout or strike occurring or threatening, it "shall be the duty of the Board, and it is hereby directed to proceed as soon as practicable to the locality of such strike or lockout, and to put itself in communication with the parties to the contro-

Here the State Board is not only told that it is its duty to investigate such a state of things, but "it is bereby directed" to do so, and to do so promptly, "as soon as practicable."

It would seem as if there was no discretion left to the State Board of Arbitration in this matter. It would also seem as if an investigation by it would settle the main point in dispute, viz. which is waged so hotly by the crack ocean steamers a most interesting one. But the doubt arises whether it is altosafety of those passengers or detracis notably from their comfort.

It is not good to wait for some awful ocean steamship disaster before any attention is given to this subject. A passenger on one of the big racers which tore across the Atlantic lately says that the saloon was so hot at times that it had to be deserted, and that despite protest on the part of several the terrific pressure was maintained. Most transatlantic travellers are not

pressed for time. Speed is not regarded as so greatly desirable in order to arrive more quickly. The glory of victory in a race is almost the sole motive. Better 'go slow" and be safe.
